

📁 ****VS CODE AI: FILE REORGANIZATION COMMAND****

For Indexed Files with Mixed Content & Code

****COPY THIS ENTIRE BLOCK TO VS CODE AI****

...

TASK: Analyze indexed files and create reorganization plan

CONTEXT:

- You have access to all file contents via indexing
- Files are mixed (content + page/code files)
- Need to organize per OPERATOR_DOCTRINE.md structure

INSTRUCTIONS:

1. CONTENT ANALYSIS:

For each indexed file, determine:

A. IS IT CONTENT OR CODE?

- Content = songs, essays, narratives, theory, manifestos
- Code = React/Astro components, layouts, routes, configs
- Assets = images, audio, PDFs

B. IF CONTENT - which category?

- /identity: Philosophy, manifestos, "who is RyanrealAF"
Examples: "Authenticity Ain't Optional", "Force of the Vernacular"
- /archive: Completed works (songs, poems, narratives)
Examples: "Guerilla Marketing", "Skittlez Arc", "Emily Saga", all song lyrics
- /curriculum: Teaching frameworks, theoretical systems
Examples: "Kinetic Codex", "Boom-Bap Blueprint", "Affective Fidelity"
- /doctrine: Technical standards, development guides
Examples: "Web Development Master Guide", design systems
- /dispatch: Current updates, reflections, blog-style content
Examples: Recent essays, commentary, work-in-progress

C. IF CODE - what type?

- Page routes (index, about, etc.)
- Layouts/templates
- Components (navigation, cards, etc.)
- Config files (astro.config, tailwind.config)
- Should stay where they are OR move to proper /src structure

2. CONVERSION NEEDS:

- Flag any PDFs/DOCX that need Markdown conversion
- Identify files needing frontmatter added
- Note any duplicate content
- Identify files that should be split (if one file contains multiple pieces)

3. PROVIDE DETAILED REPORT IN THIS FORMAT:

REORGANIZATION PLAN

CONTENT FILES

/identity (Philosophy & Mission)

- `current/path/file.md` → `/src/content/identity/authenticity-manifesto.md`
- **Current location:** [exact path]
- **File type:** Markdown / PDF / DOCX
- **Reason:** Core philosophy piece about [brief description]
- **Actions needed:**
 - [] Add frontmatter (title, date, category, tags)
 - [] Add doctrine notes section
 - [] Convert from PDF (if applicable)
- **Key themes identified:** [list 2-3]

/archive (Completed Works)

Songs

- `current/path/song.pdf` → `/src/content/archive/songs/guerilla-marketing.md`
- **Current location:** [exact path]
- **File type:** PDF / Markdown / Text
- **Reason:** Song lyrics with musical direction
- **Actions needed:**

- ☐ Convert PDF to Markdown
- ☐ Add frontmatter (title, date, category: "archive", tags: ["song", "grit-gospel"])
- ☐ Preserve musical direction annotations
- ☐ Add doctrine notes
- **Musical style:** [e.g., "hollow drill beat", "trap fusion"]

Narratives

- `current/path/story.docx` → `/src/content/archive/narratives/skittlez-chapter-1.md`
- **Current location:** [exact path]
- **File type:** DOCX / Markdown
- **Reason:** Part of Skittlez Arc narrative
- **Actions needed:**
 - ☐ Convert DOCX to Markdown
 - ☐ Add frontmatter
 - ☐ Add doctrine notes
 - ☐ Link to related chapters
- **Key characters:** [list]

/curriculum (Teaching Frameworks)

- `current/path/codex.docx` → `/src/content/curriculum/kinetic-codex.md`
- **Current location:** [exact path]
- **File type:** DOCX / PDF / Markdown
- **Reason:** Core teaching framework about rhythmic communication
- **Actions needed:**
 - ☐ Convert to Markdown
 - ☐ Add frontmatter
 - ☐ Add doctrine notes (tactical insights, related content)
 - ☐ Format code examples properly
- **Core concepts:** [list main teachings]

/doctrine (Technical Standards)

- `current/path/web-guide.txt` → `/src/content/doctrine/web-development-master-guide.md`
- **Current location:** [exact path]
- **File type:** Text / Markdown
- **Reason:** Technical specification document
- **Actions needed:**
 - ☐ Convert to proper Markdown
 - ☐ Add frontmatter
 - ☐ Format code blocks
 - ☐ Add cross-references

/dispatch (Updates & Commentary)

- `current/path/essay.md` → `/src/content/dispatch/fixing-broken-systems.md`
- **Current location:** [exact path]
- **File type:** Markdown / Text
- **Reason:** Current commentary/reflection
- **Actions needed:**
 - [] Add frontmatter with current date
 - [] Add tags
- **Topics:** [list main themes]

CODE FILES

Already Properly Located

- `/src/pages/index.astro`
- **Status:**  Correct location
- **Action:** None needed

Needs Relocation

- `components/Navigation.tsx` → `/src/components/Navigation.astro`
- **Current location:** [exact path]
- **Reason:** React component needs Astro conversion
- **Actions needed:**
 - [] Move to /src/components/
 - [] Convert from React to Astro (if applicable)
 - [] Apply Dark Elegance styling

Configuration Files

- `tailwind.config.js` → `/tailwind.config.mjs`
- **Status:** Keep at root
- **Actions needed:**
 - [] Update with Dark Elegance color palette
 - [] Convert to .mjs if needed

ASSETS

Images

- `image.jpg` → `/public/images/archive/image.jpg`

- ****Current location:**** [exact path]
- ****Used in:**** [which content piece]
- ****Actions needed:****
 - ☐ Optimize (WebP conversion)
 - ☐ Move to /public/images/

Audio

- `song-sample.m4a` → `/public/audio/guerilla-marketing-sample.m4a`
 - ****Current location:**** [exact path]
 - ****Related to:**** [which song/piece]
 - ****Actions needed:****
 - ☐ Move to /public/audio/
 - ☐ Consider compression

FILES NEEDING SPLIT/SEPARATION

- `combined-songs.md` → Multiple files
 - ****Reason:**** Contains 5 separate songs
 - ****Proposed split:****
 - `/src/content/archive/songs/song-1.md`
 - `/src/content/archive/songs/song-2.md`
 - [etc.]

DUPLICATES DETECTED

- `guerilla-marketing.pdf` and `guerilla-marketing.md`
 - ****Issue:**** Same content in two formats
 - ****Recommendation:**** Keep Markdown version, archive PDF
 - ****Action needed:**** Your decision

UNCERTAIN - NEED YOUR INPUT

- `weird-file.txt`
 - ****Current location:**** [exact path]
 - ****Content summary:**** [brief 1-2 sentence description of what's in it]

- **Possible categories:** identity OR archive OR unclear
- **Question for you:** What is this and where should it go?

- `page-draft.md`

- **Current location:** [exact path]
- **Content summary:** [description]
- **Issue:** Appears to be work-in-progress page design
- **Question:** Is this content (dispatch) or code documentation?

SUMMARY STATISTICS

Total files analyzed: [number]

Content files: [number]

- Identity: [number]
- Archive: [number] (Songs: X, Narratives: Y, Poems: Z)
- Curriculum: [number]
- Doctrine: [number]
- Dispatch: [number]

Code files: [number]

- Pages: [number]
- Components: [number]
- Layouts: [number]
- Config: [number]

Assets: [number]

- Images: [number]
- Audio: [number]
- Other: [number]

Uncertain/Need input: [number]

CONVERSION WORK REQUIRED

High Priority:

1. Convert [X] PDFs to Markdown

2. Convert [X] DOCX files to Markdown
3. Add frontmatter to [X] files
4. Add doctrine notes to [X] curriculum files

Medium Priority:

5. Split [X] multi-content files
6. Optimize [X] images to WebP
7. Convert [X] React components to Astro

Low Priority:

8. Update [X] config files
9. Organize [X] asset files

ESTIMATED TIMELINE

- **Analysis phase:** Complete
- **File moves:** ~[X] minutes (automated)
- **Format conversions:** ~[X] hours (semi-automated)
- **Frontmatter additions:** ~[X] hours (templated)
- **Doctrine notes:** ~[X] hours (requires thought)

AWAITING YOUR APPROVAL

Before I proceed, please confirm:

1. Review the categorization decisions above
2. Resolve any "UNCERTAIN" items
3. Decide on duplicate handling
4. Choose execution order:
 - Option A: Execute all at once
 - Option B: Execute by category (identity first, then archive, etc.)
 - Option C: Execute by priority (content files first, then code)

Reply with:

- "Approved - execute all"
- "Approved - execute [specific section]"
- "Hold - need changes to [specific items]"

AFTER APPROVAL, I WILL:

1. Create backup of current structure
 2. Create all necessary directories
 3. Move files to new locations
 4. Convert formats as specified
 5. Add frontmatter templates
 6. Update any internal links
 7. Generate completion report
-

I WILL NOT:

- Delete any original files (until you explicitly approve)
 - Modify file contents without permission
 - Overwrite existing organized content
 - Move files without showing you this plan first
-

END OF REPORT

...

****HOW TO USE THIS****

****Step 1: Paste to VS Code****

Copy the entire command block above and paste it into your VS Code AI chat.

****Step 2: Review the Report****

The AI will generate a detailed report showing:

- Every file's current and proposed location
- Why it's being categorized that way
- What work is needed (conversions, frontmatter, etc.)
- Any uncertainties flagged for your decision

****Step 3: Approve or Adjust****

Based on the report, you can:

- Approve everything: `"Approved - execute all"`
- Approve sections: `"Approved - execute identity and archive sections"`
- Request changes: `"Move file X to category Y instead"`
- Resolve uncertainties: `"weird-file.txt goes to dispatch"`

****Step 4: Execute****

Once approved, the AI will systematically reorganize everything while maintaining backups.

****SAFETY FEATURES BUILT IN****

- ✓ ****Analysis before action**** - Nothing moves until you approve
- ✓ ****Backup creation**** - Original structure preserved
- ✓ ****Uncertainty flagging**** - AI asks when it's not sure
- ✓ ****Duplicate detection**** - Won't overwrite without asking
- ✓ ****Detailed reporting**** - You see exactly what will happen
- ✓ ****Surgical control**** - Execute all, some, or one at a time

****EXAMPLE APPROVAL RESPONSES****

****Approve everything:****

...

Approved - execute all.

Additional notes:

- For duplicates, keep Markdown versions
- Split combined-songs.md as proposed
- weird-file.txt goes to /dispatch

...

****Approve in phases:****

...

Approved - execute archive section only.

Hold on identity until I review those pieces again.

...

****Request adjustments:****

...

Good plan, but make these changes first:

- Move "Authenticity Manifesto" to /archive instead of /identity
- Don't split combined-songs.md yet
- weird-file.txt is actually doctrine material

Then execute with those adjustments.

...

**TROUBLESHOOTING**

****If AI doesn't provide full detail:****

...

Provide more detail for each file:

- Current exact path
- Brief content description
- Specific actions needed
- Key themes identified

...

****If AI moves files without approval:****

...

STOP. Undo last action.

Follow protocol: analyze first, report, await approval, then execute.

...

****If categorizations seem wrong:****

...

For [filename], you categorized as [X] but it should be [Y] because [reason].

Re-categorize and update the plan.

...

****END OF COMMAND ARTIFACT****
